Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 10-245183 A (JP '183) in view of Smillie, III 4,941,797.

JP '183 discloses a double deck elevator comprising an upper cage (Cu), and a lower cage (Cd) vertically movable together in a hoistway, and a door driving unit disposed on top of the respective cages.

Smillie '797 discloses a lifting platform comprising covers 82 including a slit (see Figure 10) for covering a space between the platform and its base, wherein the covers are formed as bellow and made of flexible plastic.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have utilized cover for covering the space between the upper and lower cage of JP '183 as disclosed by Smillie in order to protect the door driving unit from foreign matters and dust.

With regard to claim 32, it would have been obvious matter of design choice to substitute a brush type closing member for the bellow-type closing member, since applicant has not disclosed that having a brush type closing member solves any stated problem and it appears that the cover would perform equally well with a bellow-type closing member.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the cited references separately discloses either a double-deck elevator or a lift system having a cover for covering a space between an upper level and a lower level.
